

GRINDING MACHINE 3M Mod.250/RM FOR WHEEL DRESSING

Tool grinding machine specific for the dressing and profiling of CBN and Diamond grinding wheels.

The machine is equipped with holding system HSK50, HSK32 or other systems on request. Useful and cheap grinding machine suitable for users of CNC tool and cutter grinders, with possibility to dress or profile the wheel directly installed in the wheel holding spindle, to obtain a perfect concentricity, with a better performance of the wheel in the machine.

TECHNICAL FEATURES

Longitudinal carriage mm.250, Transversal carriage mm.120, Motor vertical traverse mm.120

Motor angular displacement on axis 360°

Longitudinal table dimensions mm.420x110

Motorized work head with 154/256 rpm, rotation 360°

Motor kW 0,37, 230/400V-50Hz-3ph, 2800 rpm

Max diameter of dressing grinding wheel mm.150

Dressing grinding wheel holding spindle Ø20mm.

Overall dimensions mm.1160x720x1460

Weight kgs.210
